

REC-CIS

1. Declare 4 variables: two of type int and two of type float. 2. Read 2 lines of input from stdin (according to the sequence given in the 'Input Format' section below) and initialize your 4 variables. 3. Use the + and - operator to perform the following operations: o Print the sum and difference of two int variable on a new line. o Print the sum and difference of two float variable rounded to one decimal place on a new line. Input Format The first line contains two integers. The second line contains two floating point numbers. Constraints 1 ≤ Integer variables ≤ 10⁴ 1 ≤ float variables ≤ 10⁴

Output Format
